

# Key Terms Summary

Gemeos Trading Inc.

---

*A plain-English summary of the core commercial terms, provided for transparency during your evaluation.*

## What You're Licensing

A license to run the Gemeos algorithm on your own brokerage account, connected via API. You're licensing software — not purchasing a managed account or an investment product.

## Cost Structure

- **One-time licensing fee:** \$14,997
- **Monthly software subscription:** \$97/month
- **Minimum recommended capital:** \$10,000, held in your own brokerage account

## What We Never Charge

No management fees. No performance fees. No profit splits. No carried interest. No exit fees.

## Your Capital

Your funds sit in your own brokerage account, in your name, under your login. Gemeos has API execution access only — we cannot withdraw, transfer, or hold your money.

## Cancellation

You can disconnect the algorithm from your broker account at any time. The monthly subscription can be cancelled; the algorithm stops running when it lapses. Your license doesn't expire — if you resume the subscription later, you reactivate without re-purchasing.
